SUMMARY

Mobile Application Developer with 3 years of experience specializing in Android development using Kotlin, Jetpack Compose, and modern architecture patterns (MVVM, Clean Architecture). Strong contributor to high-performance UI, real-time features, video playback systems, and scalable API integrations. Experienced in collaborating with cross-functional teams, writing maintainable code, and delivering optimized, user-centric mobile apps.

EXPERIENCE

IIPROF Consultancy Limited

Remote

Freelance Mobile Application Developer

2026 – Present

- Currently developing an Android application for a multi-role platform connecting users across different service and donation workflows.
- Working with role-based workflows for Brokers, Customers, Donors/Donees, IT Professionals, Donation Givers/Receivers, Admin, and Super Admin users.
- Integrating the Razorpay Payment Gateway to support secure in-app payment workflows and transaction handling.
- Working with existing backend APIs and collaborating with the backend team to integrate application workflows and validate end-to-end functionality.
- Implementing and refining application architecture, navigation, API integration, and role-based functionality using Kotlin and Jetpack Compose.
- **Skills:** Kotlin, Jetpack Compose, REST APIs, Razorpay, Android SDK, Git

Score Information and Technologies

Onsite

Mobile Application Developer

Mar 2026 – Aug 2026

- Worked on a Kotlin Multiplatform (KMP) based Solar Cleaning Management System, developing shared business logic and application workflows within the KMP project.
- Worked with role-based workflows for three primary user types: Admin, Customer/User, and Mechanic, with different permissions and operational flows for each role.
- Implemented and integrated business workflows for managing solar cleaning operations, including job assignment, mechanic activities, and operational status tracking.
- Collaborated with backend and QA teams for API integration, feature development, workflow validation, and debugging of the KMP application.
- Maintained and enhanced legacy Android applications built with XML, MVC, SQLite, and traditional Android components across multiple product versions.
- Worked on ERP-based applications covering modules such as employee attendance, machine production, and operational data management.
- Implemented feature enhancements and bug fixes across existing application versions while maintaining compatibility with established legacy codebases.
- **Skills:** Kotlin Multiplatform (KMP), Kotlin, Android SDK, XML, MVC, SQLite, Eclipse, Servlet, REST APIs

Xellier Network Solutions

Remote

Mobile Application Developer

Aug 2023 – Mar 2026

- Developed, enhanced, and maintained Android applications using Kotlin and Jetpack Compose, implementing modern and scalable UI components.
- Implemented a Campaign Management system utilizing Jetpack Compose for the frontend and AWS Amplify DataStore for robust backend synchronization.
- Developed a time-based filtering system for football charts, aggregating hourly event data into dynamic daily, weekly, and monthly views.
- Built a custom video player with frame scrubbing, ExoPlayer enhancements, gesture controls, and optimized buffering for low-latency playback.
- Collaborated closely with UI/UX designers to ship responsive, animation-rich interfaces such as carousel feeds, charts, and dynamic dashboards.
- Integrated GraphQL APIs with efficient pagination, reducing load times and improving data handling for real-time screens.
- Implemented in-app updates, nested navigation, push notifications, and lifecycle-aware state management.

- Worked with Clean Architecture + MVVM ensuring testability, maintainability, and modular feature development.
- Contributed to the iOS app using SwiftUI, improving UI responsiveness and assisting with network integrations.
- **Skills:** Kotlin, Jetpack Compose, Coroutines, Flow, GraphQL, ExoPlayer, Firebase, Room DB, AWS Amplify, Git

Xellier Network Solutions

Remote

Android Developer Intern

Mar 2023 – Aug 2023

- Successfully migrated large XML-based UI components to Jetpack Compose, improving maintainability and reducing UI boilerplate.
- Contributed to refactoring legacy code into MVVM architecture, enabling better state management and cleaner UI logic.
- Collaborated with senior developers to implement responsive UI layouts and optimize rendering performance.
- **Skills:** Kotlin, Jetpack Compose, XML, MVVM, Git

PROJECTS

One-Percent (Habit Tracker & Todo App)

2026

- Developed a hybrid productivity application combining daily habit tracking with task management.
- Engineered a custom HeatMap calendar component in Jetpack Compose to visualize task completion data via epoch timestamps, featuring a GitHub-style contribution UI.
- **Tech:** Kotlin, Jetpack Compose

Custom Video Player (Jetpack Compose + ExoPlayer)

2024

- Developed a feature-rich media player with live frame preview, scrubbing, speed controls, and custom UI components.
- Built optimized buffering logic and lifecycle-aware playback management.
- **Tech:** Kotlin, Compose, ExoPlayer, Coroutines

Realtime Dashboard + Carousel Feed System

2024

- Designed dynamic dashboards with real-time updates using LiveView and Compose.
- Implemented Pinterest-style carousel feed with caching, animations, and lazy-loading.
- **Tech:** Compose, LiveView, GraphQL, MVVM

SKILLS SUMMARY

Languages: Kotlin, Swift

Android: Jetpack Compose, Android SDK, XML, ExoPlayer, Navigation 3, Material 3

Architecture: MVVM, MVI, MVC, Clean Architecture

Networking: GraphQL, REST APIs, Ktor

Tools: Git, GitHub, CI/CD (basic), Firebase, AWS Amplify DataStore

Other: Kotlin Multiplatform (KMP), In-App Updates, Notifications, Room DB, LiveView, StateFlow/SharedFlow, Play Store Publishing

Certifications: Jetpack Compose Bootcamp (37h) – Paulo Dichone; Modern Android App with REST API & Ktor (16.5h) – Stefan Jovanovic; Android Development with Kotlin (17h) – Michael Eramo

EDUCATION

University of Calcutta

Kolkata, India

Bachelor of Commerce – GPA: 8.1

2020 – 2023
